

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

- The formation of clay balds in arid lands:* DR. W. H. HAAS, Northwestern University, Evanston.
- The intercision of Pike River near Kenosha, Wis.:* JOHN R. BALL, Northwestern University, Evanston.
- The effect of sewage and other pollution on animal life of rivers and streams:* DR. FRANK COLLINS BAKER, curator of Natural History Museum, University of Illinois, Urbana.
- A possible interpretation of the synchronous flashing of fireflies:* DR. CHRISTIAN A. RUCKMICK, University of Illinois, Urbana.
- Animal physiological life histories and modern methods of representing climate:* DR. V. E. SHELFORD, Natural History Survey, University of Illinois, Urbana.
- Sexual dimorphism in the Acanthocephala:* DR. H. J. VAN CLEAVE, University of Illinois, Urbana.
- Notes on the life history of the Crane-fly of the genus Geranomyia Haliday:* C. P. ALEXANDER, University of Illinois, Urbana.
- A review of the species of water mites:* DR. RUTH MARSHALL, Lane Technical High School, Chicago.
- The morphology of the antorbital process in the Urodeles:* GEO. W. HIGGINS, University of Illinois, Urbana.
- Some controlling factors in the use of fungous diseases in combatting insect pests:* DR. R. D. GLASGOW and C. S. SPOONER, University of Illinois, Urbana.
- A comparison of soil temperature in up-land and bottom-land forests:* DR. W. B. MCDUGALL, University of Illinois, Urbana.
- An effect of topography and exposure on plant distribution:* DR. H. S. PEPOON, Lake View High School, Chicago.
- Topographic relief as a factor in plant succession:* DR. GEO. D. FULLER, University of Chicago, Chicago.
- On the plant ecology of Ogle County, Illinois:* H. DE FOREST, introduced by DR. GEO. D. FULLER, University of Chicago, Chicago.
- A note on the distribution of oaks in LaSalle County:* DR. GEO. D. FULLER, University of Chicago.
- Preserves for ecological study.* (The work of the Ecological Society of America's committee): DR. V. E. SHELFORD, University of Illinois, Urbana.
- Distribution of oaks on Lake Chicago beaches in Evanston and New Trier Townships:* DR. W. G. WATERMAN, Northwestern University, Evanston.
- Forest distribution in northern Evanston and southeastern New Trier Townships:* LILLIAN MARGARITE SIMMONS, Northwestern University, Evanston. (Introduced by DR. W. G. WATERMAN.)
- A probable cause of foot rot of wheat:* DR. F. L. STEVENS and E. DUNGAN, University of Illinois, Urbana.
- The sooty blotch of pome fruits:* A. C. COLBY, University of Illinois, Urbana.
- The genus Septoria, presented in tabulation, with discussion:* PHILIP GARMAN and DR. F. L. STEVENS, University of Illinois, Urbana.
- Forest types and forest associations:* (a) *From the ecologist's point of view:* DR. HENRY C. COWLES, University of Chicago, Chicago. (b) *From the forester's point of view:* R. B. MILLER, state forester of Illinois, Urbana. General discussion, by DR. GEO. D. FULLER and DR. A. G. VESTAL.
- The cause of increased oxidation in the fertilized egg:* DR. W. E. BURGE, University of Illinois, Urbana.
- Notes on the life history of Psithyrus, an inquiline in the nests of Bumblebees:* THEODORE H. FRISON, University of Illinois, Urbana.
- Cnidosporidia in the vicinity of Urbana:* DR. R. KUDO, University of Illinois, Urbana.
- The cultivation of Spirochaeta Novyi without the use of tissues from animal organs:* C. H. BEHRENS, Purdue University, Lafayette, Ind.
- The relation of legibility of the printed page to reading:* MADISON BENTLEY, University of Illinois, Urbana.
- The cumulative effects of rational increments:* COLEMAN R. GRIFFITH, University of Illinois, Urbana.
